

New cold weather spray foam! PF-7300 Soya Super Winter is in.

J&G Urethanes/Superior Spray Systems has added a new cold weather spray foam insulation to our repertoire. With the addition on PF-7300 Soya Super Winter, we can now offer our residential customers spray foam insulation services on substrates as cold as minus 20. This gives us the ability to accommodate our customer's needs for more of the winter months.

With PF-7300 Soya Super Winter we can offer our customers all the same great advantages of PF-7300 Soya, but with the added cold weather benefit. This premium 2 pound foam will still give you the maximum R value per inch of any insulation. It's the environmentally friendly option for your insulation needs.
